

Undergraduate Coursework — Peter Haine

Fall 2012		IAP 2013		Spring 2013	
5.111	<i>Principles of Chemical Science</i>	6.S189	<i>Introduction to Python</i>	8.02	<i>Physics II</i>
8.01	<i>Physics I</i>	18.095	<i>Math Lecture Series</i>	18.100C	<i>Real Analysis</i>
18.03	<i>Differential Equations</i>			18.781	<i>Theory of Numbers</i>
24.03	<i>Good Food: the Ethics & Politics of Food</i>			24.253	<i>Philosophy of Mathematics</i>
Fall 2013		IAP 2014		Spring 2014	
7.012	<i>Introductory Biology</i>	18.S097	<i>Intro. to Algebraic Topology</i>	18.104	<i>Seminar in Analysis</i>
18.701	<i>Algebra I</i>	DRP	<i>Differential Geometry</i>	18.702	<i>Algebra II</i>
18.901	<i>Introduction to Topology</i>			18.904	<i>Seminar in Topology</i>
24.241	<i>Logic I</i>			21M.030	<i>Introduction to World Music</i>
Fall 2014		IAP 2015		Spring 2015	
14.01	<i>Principles of Microeconomics</i>	UROP	<i>Quasicategories & a discrete model for topological K-theory</i>	18.745	<i>Introduction to Lie Algebras</i>
18.103	<i>Fourier Analysis: Theory & Applications</i>			18.821	<i>Project Lab in Mathematics</i>
18.905	<i>Algebraic Topology I</i>			18.917	<i>Topics in Algebraic Topology</i> [*]
21A.150	<i>Teaching & Learning: Cross-cultural Perspectives</i>			Math 161	<i>Category Theory in Context</i> [‡]
				UROP	<i>Quasicategories & a discrete model for topological K-theory</i>
Fall 2015		IAP 2016		Spring 2016	
6.0001/2	<i>Introduction to Computer Science</i>	21G.501	<i>Japanese I</i>	18.906	<i>Algebraic Topology II</i>
18.705	<i>Commutative Algebra</i>			18.952	<i>Theory of Differential Forms</i>
18.755	<i>Introduction to Lie Groups</i>			21G.703	<i>Spanish III</i>
21G.702	<i>Spanish II</i>				

^{*}Taken as a listener. [‡]Taken at Harvard.
